Symposium Announcement

Systematics and ecology of Bibionomorpha

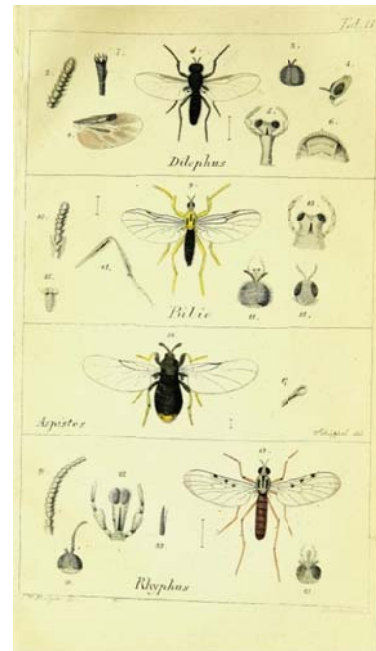

Dear colleagues,

You are invited to participate in the “Systematics and Ecology of Bibionomorpha” symposium, taking place during the 9th International Congress of Dipterology. The purpose of this symposium is to provide a forum for the presentation of research on all biological aspects of the Bibionomorpha, from taxonomy to ecology, behaviour to morphology, and everything in between.

We encourage you to attend what is sure to be a lively and informative congress, and to present your research to your international colleagues! Please send us an email if you are planning on coming, along with your potential talk title.

If you have any further questions, please contact one of us via email.

Looking forward to seeing you in Namibia!

Chris Borkent and Sarah Oliveira
