

# MORPHOLOGICAL CHARACTER SYSTEMS in DIPTERA

Dear colleagues,

You are invited to participate in the “Morphological character systems in Diptera” symposium, being convened for the 9<sup>th</sup> International Congress of Dipterology. The purpose of this symposium is to stimulate discussion of Diptera morphology, with respect to taxonomy and phylogenetic analysis. Please see the general topic guidelines below and contact us with any questions.

Kind regards,  
Greg Curler & John Hash

Presentation topics may include, but are not limited to the following:

- Homology assessment
- Techniques for interpreting and illustrating complex characters
- Utility of phenotypic data for phylogenetic analysis
- Advanced imaging techniques
- Recent changes to terminology
